It is early in the morning. It is dark outside. Then the sky gets lighter and lighter. You see clouds in the sky.

What else do you see in the sky?

For review purposes only.

Student reads

I see the sun!

For review purposes only.

You go to school. It's still pretty early in the morning. You check to see where the sun is now. You don't look right at the sun because it can hurt your eyes.

Is the sun shining in the sky now?

**Yes, it is! It is fun to see
the sun!**

For review purposes only.

Then, at noon, it's time for recess.

Where is the sun in the sky at noon?

It is up in the sky.

Now it is evening. The sun is close to the horizon.
That's where the sky meets the land.

**The sun looks like it is sinking down
below the horizon. What happens?**

For review purposes

The sun sets. The sky gets red!

For review purposes only.

The sun does not set at the same time each day. In the summer, you may eat dinner at 7 o'clock.

On a summer evening, is the sky usually light or dark at 7?

For review purposes

**In summer, the sun is up at 7.
It has not yet set.**

In the winter, you may eat dinner at 7 o'clock.
But outside, it is dark.

**On a winter evening, is the sun usually
in the sky at 7?**

In winter, the sun is not up at 7.
It has set.

For review purposes only.

In summer, the sun rises early and sets late. That means the sun shines down on us for a long time in summer.

Does that change the temperature?

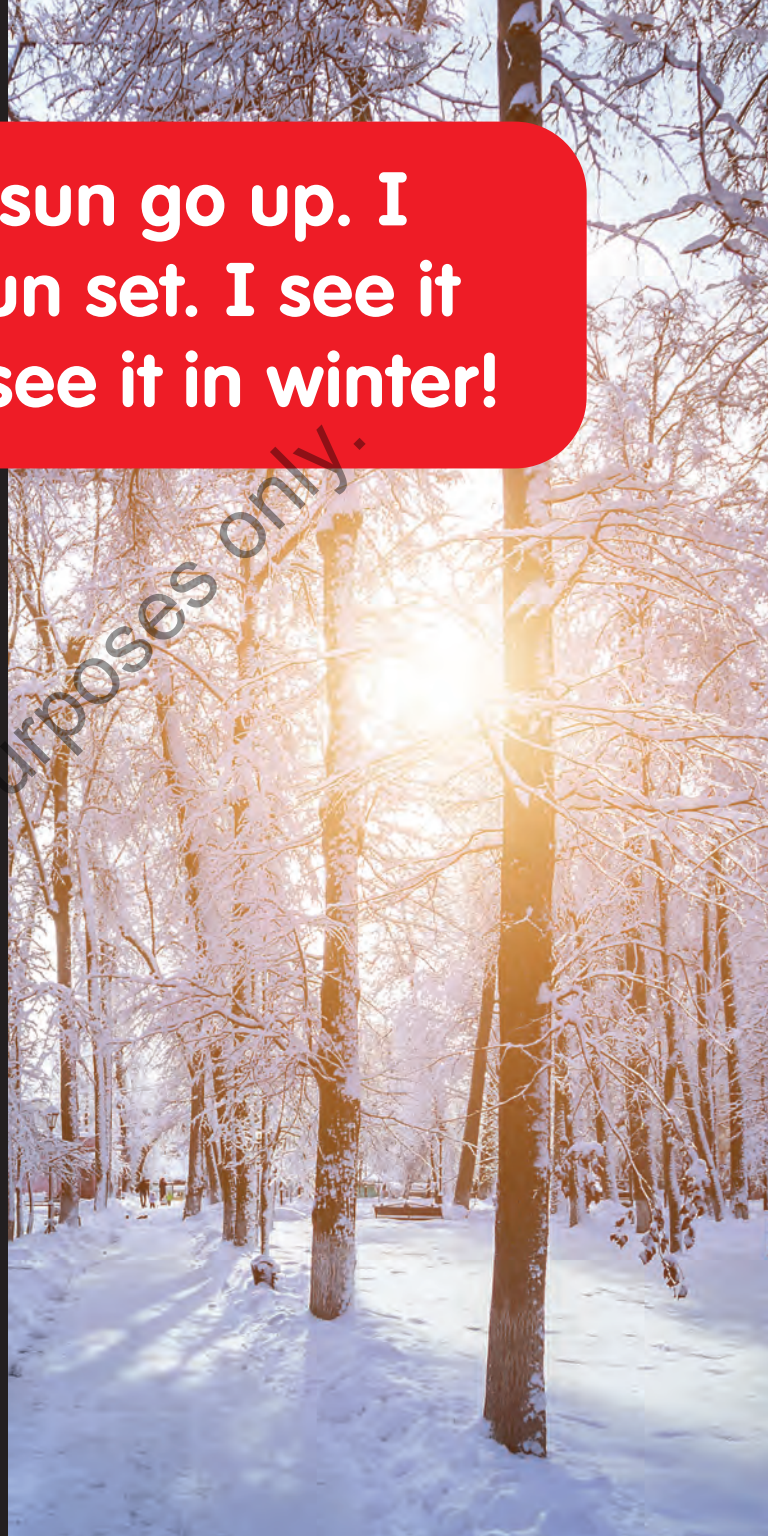

Yes! It gets hot in summer.
I like summer!

I can see the sun go up. I
can see the sun set. I see it
in summer. I see it in winter!

For review purposes only.
