

Turn Up the Volume of Reading

To support a high volume of reading, Knowledge Library features topically aligned text sets on essential topics in **Social Studies, Science, ELA, and Arts & Culture**. Reading multiple texts about one topic not only increases topic-specific knowledge, it builds comprehension skills that can be applied across these disciplines. Each topic is **correlated to state standards and core ELA curriculums**, making Knowledge Library a powerful supplement in any classroom or instructional routine.

A box for every topic.
A text for every reader!

Each content-rich Knowledge Library text set comes packaged with resources to orchestrate small-group instruction—six copies of each student text and corresponding teaching materials.

	Social Studies		Science		ELA		Arts & Culture
	OUR WORLD Civics & Community	YESTERDAY & TODAY History & More	LIVING THINGS Life Science	EARTH & SPACE Physical Science	GREAT STORIES Genre Study	PAGE TURNERS Literary Themes & Elements	ARTS & CULTURE Art, Sports, and More
